

Table of Contents

Foreword	i
Preface	iii
Table of Contents	v
1 Introduction	
1.1 The purpose of this study	1
1.2 A brief historical note	3
1.3 The concept of structure	7
1.4 A dynamic theory of production	9
1.5 The scope of this study	12
2 Optimal Structural Change and Related Problems	
2.1 Introduction	15
2.2 The vintage model	16
2.3 The notion of optimal structure and optimal structural change	34
2.4 Economies of scale and optimal capacity expansion in a putty-clay model	40
2.5 Optimal capacity expansion and the size distribution of micro units	54
2.6 Scale efficiency and the costs of decentralisation	70
Appendix 2.1 Proof of Theorem 2.1	75
Appendix 2.2 Properties of $C(\tau)$	78

3	The Frontier Production Function: Measurement of Productive Efficiency and Technical Change	
3.1	Introduction	79
3.2	Definition of the frontier production function	80
3.3	The measurement of efficiency	82
3.4	Generalised Farrell measures of efficiency	86
3.5	Dynamic aspects of efficiency	95
3.6	The characterisation of technical change	100
3.7	Concluding remarks	103
	Appendix 3.1 Further aspects of the efficiency frontier	104
4	Empirical Approaches to the Frontier Production Function	
4.1	Introduction	109
4.2	Estimation of parametric frontier production functions	110
4.3	Deterministic frontier	113
4.4	Stochastic frontiers	118
4.5	Estimation via cost functions	125
4.6	An example	128
4.7	Technical change and the frontier production function	130
4.8	Concluding remarks	135
5	The Short-Run Industry Production Function	
5.1	Introduction	139
5.2	Establishing the short-run industry production function	142
5.3	Representation of the short-run industry production function	145
5.4	Further characterisation of the short-run function	153
	Appendix 5.1 The isoquant plotting algorithm	157
6	Empirical Analyses: An Overview	
6.1	Introduction	167
6.2	Description of structure	169
6.3	The main empirical results	176

7	The Swedish Dairy Industry	
7.1	Introduction	183
7.2	Data	184
7.3	Structural description	185
7.4	Estimation of deterministic and stochastic frontier production functions	191
7.5	Frontier production functions and technical progress	204
7.6	Efficiency	215
7.7	Concluding remarks	227
8	The Swedish Cement Industry	
8.1	Introduction	229
8.2	Data	229
8.3	Structural description	233
8.4	The short-run industry production function and technical change	237
8.5	Technology	246
8.6	Structural features	249
8.7	Conclusions	255
9	The Swedish Pulp Industry	
9.1	Introduction	257
9.2	Data	258
9.3	Structural description	260
9.4	The short-run industry production function and technical change	264
9.5	Concluding remarks	278
10	Swedish Pig Iron Production	
10.1	Introduction	279
10.2	Data	279
10.3	The short-run industry production function	280
10.4	A case of coexisting production techniques	281
10.5	Technical progress	286
10.6	Concluding remarks	289

11 The Norwegian Aluminium Industry	
11.1 Introduction	291
11.2 Data and structural description	292
11.3 The short-run function and technical change	294
11.4 Concluding remarks	304
References	305
Subject Index	317
Author Index	319
