

CONTENTS

FOREWORD	13
INTRODUCTION	15
	<i>The background to agricultural policy</i> 15
	<i>The origin and development of agricultural policy in Sweden</i> 16
	<i>The regulation of markets and prices</i> 18
	<i>The present role of agriculture in the economy</i> 20
	<i>Problems to be analyzed</i> 21
PART 1.	THE EFFICIENCY AND COMPETITIVENESS OF AGRICULTURE
CHAPTER 1.	COMPARISONS OF PRODUCTIVITY IN AGRICULTURE AND OTHER SECTORS 27
	<i>The level of productivity</i> 27
	<i>The productivity trend</i> 30
CHAPTER 2.	THE WORLD MARKET AND THE COMPETITIVENESS OF SWEDISH AGRICULTURE 33
	<i>Agricultural support in Western Europe</i> 35
	<i>The effects of agricultural support in non-European countries</i> 39
	<i>Non-European agricultural export prices</i> 42
	<i>World market prices under free trade</i> 46
CHAPTER 3.	THE PRODUCTIVITY, SIZE AND STRUCTURE OF AGRICULTURE 47
	<i>The size of the sector</i> 47
	<i>Structure</i> 50
	<i>Economies of scale in agriculture</i> 55
PART 2.	INCOMES AND PROFITABILITY IN AGRICULTURE
CHAPTER 4.	PROFITABILITY AND FARM LAND VALUES 63
	<i>The influence of profitability on factor prices in agriculture</i> 64
	<i>The development of farm land values</i> 65

	<i>Natural conditions and land values</i>	68
	<i>Capitalization and economies of scale</i>	69
	<i>Alternative profitability concepts in agriculture</i>	73
CHAPTER 5.	INCOME, WEALTH AND LIVING STANDARDS IN AGRICULTURE	75
	<i>Alternative farm income concepts</i>	75
	<i>The growth of farm income</i>	80
	<i>Consumption and saving in agriculture</i>	83
	<i>The distribution of income and wealth in agriculture</i>	88
	<i>Low standards of living in agriculture</i>	91
	<i>Summary</i>	93
PART 3.	THE COSTS OF MAINTAINING AN AGRICULTURAL SECTOR	
CHAPTER 6.	THE COSTS OF AGRICULTURAL SUPPORTS	97
	<i>Reallocation gains</i>	97
	<i>The present cost of support to agriculture</i>	102
	<i>Welfare benefits accruing from agriculture</i>	104
	<i>Principles underlying the calculation of costs</i>	105
CHAPTER 7.	THE COSTS OF EMERGENCY FOOD RESERVES	109
	<i>Food needs in emergency situations</i>	109
	<i>How to minimize the cost of meeting emergency food needs?</i>	115
	<i>How rapidly can optimal agricultural preparedness be achieved?</i>	118
	<i>Summary</i>	119
PART 4.	PRICE POLICY IN AGRICULTURE – EFFECTS AND PROBLEMS	
CHAPTER 8.	PRICE LEVEL AND FARM OUTPUT	123
	<i>Price level and production goals – some general aspects</i>	123
	<i>Empirical analysis of the relation between prices and production</i>	125
	<i>Time series analysis</i>	126
	<i>Cross–section analysis</i>	130
	<i>Price policy to contract farm output</i>	132
CHAPTER 9.	PRICE LEVEL, EFFICIENCY AND INCOME IN AGRICULTURE	135
	<i>Effects of instantaneous price reduction</i>	135
	<i>Effects of successive price reduction</i>	139

	<i>The impact of price reductions on factor proportions</i>	144
	<i>The impact of price reduction on small farmers</i>	145
	<i>Summary</i>	146
CHAPTER 10.	PRICE POLICY IN THEORY AND PRACTICE	147
	<i>Prices and the allocation of resources: theoretical considerations</i>	147
	<i>Principles underlying present Swedish price policy</i>	154
	<i>Relatively high and relatively low prices to consumers</i>	156
	<i>Alternative methods of a low price policy</i>	159
	<i>Prices in an »optimal» price system</i>	162
	<i>The effects of alternative price systems on food demand and supply</i>	164
APPENDIX A.	MEASUREMENTS OF PRODUCTIVITY	169
APPENDIX B.	AGRICULTURAL PROTECTION AND THE WORLD FOOD MARKET	177
APPENDIX C.	THE DETERMINANTS OF FARM LAND VALUES	185
APPENDIX D.	PROFITS IN AGRICULTURE	189
APPENDIX E.	INCOME AND WEALTH IN AGRICULTURE	197
APPENDIX F.	PRODUCTIVE CAPACITY AND FACTOR REQUIREMENTS FOR EMERGENCY SITUATIONS	209
APPENDIX G.	SUPPLY ELASTICITIES IN AGRICULTURE	214
APPENDIX H.	THE EFFECT OF PRICES ON INCOME	222
APPENDIX J.	OPTIMAL PRICE POLICY FOR AGRICULTURE AT PRODUCTION CAPACITY RESTRICTION	228
APPENDIX K.	METHODS AND COSTS OF AGRICULTURAL SUPPORT	243
APPENDIX L.	PRICES, CONSUMPTION, PRODUCTION AND USE OF RESOURCES WITH ALTERNATIVE PRICE SYSTEMS	248
BIBLIOGRAPHY		263

LIST OF DIAGRAMS

1. Additional expenditures (at wholesale price level) on food consumption due to border protection, 1948–67 33
2. Agricultural and industrial prices, 1948/52–70 34
3. Marginal yield in agriculture (regression between value of production per hectare and total acreage) 48

4. Marginal profitability (regression between labour return and total volume of production measured at opportunity costs for land) 49
5. Agricultural land in Western Europe by size of farm 51
6. Profitability and farm size, existing farms on the plains of southern Götaland, 1966 70
7. Profitability and farm size, optimally organized farms on the plains of Svealand, 1966 73
8. Growth of farm income, 1954–66 81
9. Consumption of farmers and other income earners, 1954–66 86
10. Range of taxable income in agriculture, 1966 89
11. Comparative distribution of income among farmers and industrial workers in rural districts, 1960 90
12. Reallocation gains in terms of labour productivity 101
13. Costs of protection 106
14. The principles for an optimal combination of storage and production to cope with an emergency 113
15. The development of prices and production in agriculture, 1938/39–1969/70 127
16. Illustration of shifts in supply curves, 1938–65 129
17. Supply curves from cross-sectional data, 1963 131
18. Optimum price relations in the national economy 148
19. Optimum price relations in agriculture 151

LIST OF TABLES

1. Labour productivity in agriculture and other sectors, 1960 and 1967 28
2. Growth of productivity in agriculture and industry, 1947–66 31
3. Labour participation in agriculture by age groups, 1945, 1960 and 1965 32
4. Change in volume and prices on the world market, 1948–66 35
5. World market for agricultural products and Western Europe's import share, 1934–66 36
6. Food consumption and share of imports in Western Europe, 1934–66 37
7. The level of price support in various countries 38
8. Size and composition of world trade in certain agricultural products, 1966 43
9. World market prices and producers' prices in Sweden and in the main exporting countries, 1966 44
10. Number of farms and total acreage in Sweden, 1944–69 52
11. Indicators of structural change in Swedish agriculture, 1954–70 53
12. Relation between farm income and acreage for the plains of southern and central Sweden, 1966 55
13. Relation between profitability and acreage, 1960 56

14. Relation between profitability and number of animals 58
15. Rise of farm land prices, 1952–66 67
16. Alternative income concepts, staple farmers (10–20 hectares arable), 1966 76
17. Income trends for basic farmers and their families (10–20 hectares arable compared with wage trends for industrial workers and farm workers, 1954–66 82
18. Use of income on basic farms (10–20 hectares arable), 1966 83
19. Levels of consumption for farmers and other income earners, 1958 85
20. Average taxable income and wealth of farmers in different acreage classes, according to tax returns, 1966 88
21. Distribution of income and wealth among farmers, 1966 91
22. Farmers with low income and wealth, classified by age and farm size, 1966 92
23. Example of food balance in Sweden for an emergency, 1980 115
24. Effect on income of an instantaneous price reduction (before any adjustment of production), plainland farms in southern and central Sweden, 1965 137
25. Effect on productivity and incomes in agriculture of successive price reductions (illustrative calculations) 140
26. Price support and import tariffs, 1960/61 and 1966/67 155
27. Calculated prices with alternative price systems (based on conditions in 1966/67) 163
28. Production under alternative price systems (hypothetical calculations) 1
29. Consumption and trade balance under alternative price systems (hypothetical calculations) 167

LIST OF DIAGRAMS IN APPENDICES

- G1 Relation between factor returns and the size (acreage) of the agricultural sector 216
- K 1 Prices and incomes with alternative types of support 243
- K 2 Prices and incomes when output is restricted 247
- L 1 Price trends for wheat, 1956–67 253
- L 2 Price trends for sugar, 1956–67 254

LIST OF TABLES IN APPENDICES

- A 1 Growth of agricultural productivity, 1938/39–1967/68 175
- A 2 Growth of industrial productivity, 1947–67 176
- A 3 Age and main occupation of farmers, 1960 166

- B 1 Level of protection for Swedish agriculture, 1948–67 182
- B 2 World trade in agricultural products and net imports to Western Europe, 1934–66 183
- B 3 The equilibrium price level of the world food market during free trade 184
- C 1 Data for a numerical example of land price formation 188
- D 1 Development of prices for farm property, by counties, 1952–66 193
- D 2 Relation between farm land values and family income in agriculture 194
- D 3 Agricultural profitability assessed from farmers' income tax returns, 1966 195
- D 4 Agricultural profitability assessed from JEU, 1966 195
- D 5 Agricultural profitability assessed from Hjelm's study, 1960 196
- E 1 Income, consumption and saving of farmers on the plains of southern and central Sweden, 1954–66 201
- E 2 Income of basic farmers, industrial workers and farm workers, 1954–66 203
- E 3 Range of income among farmers according to JEU, 1957–62 204
- E 4 Range of income among farmers according to tax returns, 1966 205
- E 5 Distribution of farmers by income, age and size of farm, 1966 205
- E 6 Distribution of farmers by income, wealth, age and size of farm, 1966 206
- E 7 Farmers' taxable income and wealth, means and totals for different ages and sizes of farm, 1966 207
- E 8 Saving and disposable income, from the Savings Studies by the National Institute of Economic Research 208
- E 9 Wealth, from the Savings Studies by the National Institute of Economic Research 208
- E 10 Distribution of wealth, from the Savings Studies by the National Institute of Economic Research, 1957 208
- F 1 Storage costs in 1966/67 prices 212
- F 2 Labour and capital required for agriculture in an emergency 213
- F 3 Annual costs for emergency agriculture, 1966 prices 213
- G 1 Prices, inputs and outputs in agriculture, 1938/39–1965/66 218
- G 2 Supply elasticities based on time-series data, 1938/39–1964/65 220
- G 3 Profitability and farm output in specified areas 220
- G 4 Supply functions and the relation between productive capacity and yield 221
- G 5 Indexes for production, productivity and prices for the 1930's, 1950's and 1960's 221
- H 1 Changes in farming economy on the plains of southern and central Sweden, based on income tax returns, 1954–65 225
- H 2 Data and assumptions for projections of farm income – wages, interest and farm structure – 1976 226

- H 3 Value added and income of farm owners on plains of southern and central Sweden, 1965 and 1976 226
- H 4 Percentage changes of value added and family income of farm owners on the plains of southern and central Sweden, 1965–76 227
- H 5 Check of the calculated effect of prices on agricultural income 227
- L 1 Coefficients used to calculate prices with alternative systems for farm prices 256
- L 2 Farm price and border protection in Sweden, 1960–67 257
- L 3 Some assumptions and the results of analyses of alternative price systems 258
- L 4 Annual variations in world market prices of some major farm products, 1951–64 259
- L 5 Precision of regression lines as estimates of price trends 259
- L 6 Alternative methods of price smoothing 260
- L 7 Relative prices in agriculture and manufacturing, 1948–70 261
- L 8 Production, productivity, producer prices and factor prices in agriculture, 1938–70 262

Institutions (Within brackets the Swedish name)

The Agricultural College (Lantbrukshögskolan)

The Central Bureau of Statistics (Statistiska Centralbyrån)

The Industrial Institute for Economic and Social Research (Industriens Utredningsinstitut)

The Ministry of Finance (Finansdepartementet)

The National Agricultural Marketing Board (Statens Jordbruksnämnd)

The National Board of Agriculture (Lantbruksstyrelsen)

The National Institute of Economic Research (Konjunkturinstitutet)

The Swedish Agricultural Research Institute (Jordbrukets Utredningsinstitut)
