

Contents

I	Project Background	13
	1. Why?	17
	2. The Background of Doctrines	19
	3. When?	23
	4. The People	24
	5. Model Vintages	26
	6. This and Other Publications	28
 PART I SHORT-TERM PRODUCTION AND RECRUITMENT DECISIONS		
II	Overview of the MOSES Economy	33
	1. Basic Ideas	33
	2. The Firm, the Rate of Return Requirement and the Markets	38
	3. Overall Macro Structure of the MOSES Economy	45
	4. Technical Change at the Micro Firm Level	45
	5. The Firm and the MIP Principle	48
	6. Long Term – Investment Decisions	55
	7. Short Term – Production Search	57
	8. Short Term – Labor Market Search	67
	9. Foreign Competition, Foreign Trade and the Exchange Rate	72
	10. Short Term – Product Market	76
	11. Some Properties of the Model System	78
	12. Sundry Thoughts on Theory and Large Scale Modeling	83
	Notes to Chapter II	88

PART II THE LONG-TERM INVESTMENT DECISION

III The Investment-Financing Decision in a MOSES Firm	95
1. The Firm as a Financial Decision System	95
1.1 The Idea of a Long-Term Plan	95
1.2 The Concept, Creation and Transformation of a Firm – Some Observations on Theory	100
– Concept	101
– Entrepreneurial Activity and Entry	102
1.3 How Does a Firm Do It – Case Description	104
2. The Objective Function of Firm Management	107
2.1 Objectives	107
2.2 Separable Additive Targeting Theorem	109
2.3 The MIP Principle Extended	116
2.4 Inflation, Capital Gains, the Real Return to Assets – What Do We Mean by Depreciation?	117
3. The Investment Financing Decision of the Firm – First Approximation to What Goes on in the Firm Model	121
4. Short-Term Budget Check on Investment	129
4.1 Principles	129
4.2 Long-Term Borrowing Decision	130
4.3 Liquidity Management	131
4.4 Crisis and Bankruptcy Proceedings	132
4.5 Taxes	134
4.6 The Final Quarterly Decision	134
<i>Supplement I; Long-Term Internal Resource Allocation at CHQ</i>	136
1. Entrepreneurial Function	136
2. Firm as an Investment Bank	137
3. The Distributional Equation	139
4. Internal Investment Allocation	143
5. Foreign Investment Decision	145
6. Financial and Other Investments	148
7. The Capital Budgeting Procedure	148
<i>Supplement II; Firm Model Planning Dialogue</i>	151

<i>Supplement III; Technical Specification of Investment-Financing Block</i>	154
Notes to Chapter III	169
IV Money in the MOSES Economy – the Determination of the Interest Rate	173
1. The Actors and Their Accounts	173
2. How Does the Capital Market Tie in with MOSES?	183
3. Why is Money at all Interesting in the MOSES Economy?	184
4. The Aggregate Asset Structure	186
5. The Portfolio Decision of Actors in the Markets	191
5.1 Firm	192
a) A Case	193
b) Computation of the Portfolio Mix	195
c) The Value, Risk Level and Proper Leverage of a Firm	197
d) Dividend Decision	202
e) Market Value of Firm Shares	203
f) Profit Target Pressure from Owners	208
g) Foreign Accounts	212
h) Comprehensive Financial Decision of a Firm	213
5.2 Household	218
5.3 Government and Central Bank	224
6. Interest Determination – First Approximation	225
7. Long-Term Interest Rate	229
Notes to Chapter IV	237
PART III THE ENDOGENOUS GROWTH CYCLE	
V The Endogenous Growth Cycle	243
– Mathematical Summary of Theory	
1. The Market Game	243
2. Market Processes and Dynamic Competition	245
3. Principal Exogenous Inputs	247
4. Non-Manufacturing (Macro) Environment	248

5.	Decisions at the Firm Level	249
6.	Firm Model	251
7.	Markets for Products	260
8.	Symbols Used	263
9.	Summary Listing of Agents, Rules and Other External Conditions in the MOSES Economy	264
VI	Growth in the MOSES Economy – The Real Side	267
1.	Introduction	267
2.	The Growth Machinery of a MOSES Firm	269
3.	The Growth Accounting System	275
4.	R&D Investment and Technical Change	280
5.	Total Factor Productivity Growth and the Representation of Production and Technical Change in MOSES	285
5.1	Market Aggregation	285
5.2	Total Factor Productivity Change in Single Production Unit	295
	Notes to Chapter VI	301
VII	Equilibrium, Coordination and Stability in the MOSES Economy – the Invisible Hand in Dynamic Markets	303
1.	The Need for a Dynamic Equilibrium Concept	303
2.	Controllability – the Policy Problem	308
3.	The Market Game Situation	312
4.	Risk and Uncertainty in MOSES	315
5.	Equilibrium or Stability?	319
6.	Welfare in the Long Run and in the Short Run	323
7.	The Preservation of Structural Diversity	326
8.	The Capital Market Process Summarized	330
8.1	Household Saving	330
8.2	Firm Investment and Finance	331
8.3	Capital Market Macro Equilibrium	332
8.4	Valuation of the Firm	332
8.5	A Few Propositions	333
9.	The Growth Cycle Verbally Summarized	335
10.	Managing the Growth Cycle	340
	Notes to Chapter VII	342

PART IV THE MICROECONOMETRICS OF MOSES

VIII Estimation, Databases, Tracking Performance and the Empirical Application of MOSES	345
1. Introduction	345
2. Micro Estimation	346
3. The Information Content of MOSES	349
3.1 Initial Conditions (Database)	350
3.2 Specification (Causal ordering)	353
3.3 Estimation	354
3.4 Taxonomy and Compatability between Internal Firm and National Statistical Systems	356
3.5 Instabilities in Institutional Definitions	358
3.6 Desired Properties	359
3.7 Symbolic vs. Numerical Analysis	362
4. MOSES Calibration in Practice	363
4.1 MOSES Micro Database	363
4.2 Actual and Planned MOSES Micro Database	368
4.3 Micro and Macro Parameter Estimation	373
5. Historical Tracking Performance of MOSES Model	378
6. Policy Analysis	402
7. The Growth Cycle	405
Notes to Chapter VIII	407
BIBLIOGRAPHY	408
