

CONTENTS

0	Preface	11
Part I. CONCEPTS AND PURPOSES		
I	Introduction	19
	1. Plans, decisions, behaviour	19
	2. The observation model	23
	3. Method of observation	28
	4. Problems of objectivity	30
II	Purpose of formal planning procedures	33
	1. Control and coordination	36
	2. Forecasting	38
	3. Targeting	39
	4. A point of reference — responsibility budgeting	42
	5. Allocation	44
	6. Flexibility — contingency planning	46
	7. Activity planning	48
III	Types of formal planning systems	50
	1. Plan horizons	51
	2. Planning methods	56
IV	The literature on corporate planning — a brief survey	64
	1. Some concepts	64
	2. History	66
	3. Mechanical decision systems	66
	4. Synthetic, internal market mechanisms	70
	5. Planning and control	70
	6. The time element	72
	7. Linkage between plan and budget	74
	8. Planning versus forecasting	75
	9. Contingency planning	76
	10. Business cycles in business planning	78
	11. Efficiency and planning	79
	12. Decentralization and efficiency	83
	13. Information and efficiency	89
	14. Planning and organization	92
	15. Recent developments	95
	16. Conclusion	97

Part II. PRACTICE

V Sales and profit projections	101
1. The market environment	101
2. Market appraisals in general	102
a) Orders, sales or rentals	
b) No aggregate price data	
c) Single valued plans — the typical feature	
d) Forecast or target	
3. The sales forecast — established products	104
a) Growth potential of market	
b) Market strategy	
c) Pricing	
d) Profitability considerations at this stage	
4. The sales forecast — new products	109
a) New markets	
b) New products	
5. The business cycle in planning	113
6. The production plan	116
7. The profit and expense projections	117
a) Ex ante costing	
b) Profit targeting	
c) RoR standards	
d) Transfer pricing	
8. Summary	123
VI Spending plans — demand for funds	124
1. Working capital	125
a) The cash position	
b) Inventories	
c) Trade credits given	
2. Investments in machinery, equipment and construction	128
a) The investment plan	
b) The appropriations plan	
3. Financial investments	130
4. Non depreciable assets	132
5. Summary	134
VII The financing plan	135
1. Internal cash-throw-off — gross saving	135
2. The external financing decision	136
3. Cash management	140
a) Ex ante fixing of the cash-position	
b) Corporate banking	
c) The buffer-stock function	
d) Cash-management	
4. Asset and debt structure	145
5. Foreign subsidiaries and foreign currency planning	146
6. Closing the future accounts — the investment budget	148

Part III. ANALYSIS AND COMPARISON	
VIII Profitability and planned performance	155
1. Profit margin criteria	156
2. Rate of return criteria — the division level	161
3. Inflation in planning	165
4. Investment project evaluation	167
a) The appropriations procedure	
b) Rate-of-return calculations	
c) Cut-off rates	
5. Project rankings	174
6. Cost-shares	175
7. Alternative plans	176
8. Transfer pricing	178
9. Investment project groups	183
10. Allocation	185
11. The system and its parts	186
IX Planning and decision making	189
1. Time dimension of planning — the horizons	190
a) Links between budget and long-term plan	
b) Plan revisions	
2. Authority, control and participation	196
a) Management participation	
b) The reviewing system	
c) Reporting	
d) Authorization stages	
3. Hierarchical ordering of remote guidance and control	207
a) Autonomy, optimality and responsibility	
b) The pluralistic system	
c) Top-down authority — ex ante	
d) Optimality, feasibility and safety	
4. Corporate policy-making	213
5. The impact of tradition	214
X Conclusions and comparisons	218
1. Conclusions	218
2. Comparisons	224
Part IV. SUGGESTIONS	
XI Suggestions towards a theory of firm behaviour	231
1. Introduction	231
2. Some characteristics of formal comprehensive planning procedures	233
3. Feed back, separable additive targeting and the MIP- principle	236
4. Four propositions for a theory of firm behaviour	239
5. A formalized growth model (Base Hypothesis)	244
6. The theory of the firm in literature	249
7. Growth and optimal size of the firm	255
8. The firm and the market	257

SUPPLEMENTS

1. Managing the comprehensive plan	265
2. A set of standard forms — division level	267
3. A formalized CHQ-planning model	277
4. Further simplification — CHQ plan	281
A. Investment Budget — cash-flow approach	281
B. Profitability and growth	284
C. Prices and profits	286
D. Inflationary management	288
E. Separable, additive targeting and the real value growth of the firm	291
F. Taxes and profitability	293
5. Costing and Production Structure	296
A. An illustration of a costing principle used frequently	296
B. A production volume index	297
C. The production function	298
6. Corporate Model Building and Computer Applications	301
7. The preliminary interview questionnaire	306
8. List of participating firms	309
Bibliography	313
Subject and terminology index	322

List of cases

1. Sophisticated targeting. (Large U.S. firm)	40
2. A system of contention. (Large U.S. firm)	41
3. Sophisticated operations planning — a package of features from two U.S., one British and one Swedish firm	58
4. Elements of the planning system — and sample variations around the mode.	61
5. Sales planning criteria for established products. (Large U.S. firm).	108
6. Prospective planning of the early warning type. (Successful U.S. firm).	111
7. New product planning. Gap analysis in U.S. firm.	112
8. Profit-sharing-incentive systems.	121
9. Exchange rate assumptions in budget. (Swedish Multi- national company).	148
10. Net profit margin criteria (large non-U.S. firm).	160
11. Marginal profitability analysis at profit centre level (one U.S. and one Swedish firm).	164
12. Profitability requirements at CHQ level and cut-off rates at investment object level (large Swedish firm).	170
13. Transfer pricing methods (5 cases).	180
14. Efficiency and coordination.	188
15. Environment interaction with simulation model (large U.S. firm).	199
