<i>Preface</i>	xxi
1 Towards perfect international financial integration	1
The aim of the study	5
Development of the bond market in focus	6
Motivation for the regional approach	8
Capital controls, monetary policy and the cost of capital	10
The importance of the order in which deregulative measures occur	13
Character of the description and analysis	14
Plan of the book	15
2 The transformation of national financial markets	21
The national versus the global financial system	21
On the analysis of financial market transformation: factors and concepts	24
Liberalization and the link between savings and economic growth	37
The international deregulation of financial markets – a historical review	45
Concluding remarks on the general process of financial market transformation	53
3 A regional study of deregulation	61
Regionalism in the transformation of national financial markets	61
Intra-regional homogeneity	63
Intra-regional dissimilarities	66
Causality issues in the analysis of financial market relationships	68
Indicators of suboptimality in the transformation process	69
The role of credit markets as a source of funds for real investment	76
Earlier studies with a similar regional focus	77
Concluding remarks on the regional approach	78

4 Saving, investment and deregulation	81
Sources of finance and the cost of capital	83
Corporate funding decisions and their macroeconomic implications	88
The adequacy of domestic saving	89
Concluding remarks on saving and investment	106
5 On measuring the international dependence of national financial markets	112
Point of departure	112
Different ways of analysing direct financial integration	114
What does the difference between interest rates tell us?	116
The choice of rates of return for comparison	117
The link between financial integration and different market imperfections	119
Approaching a measure of market efficiency	120
Measuring the level of direct financial integration	121
Applied definition and the choice of model	122
Problems of measurements and standardization	123
Lessons learnt from a review of the relevant literature	127
Concluding remarks on the measurement issue	129
6 External bond market deregulation	132
Exchange controls in the regional perspective	133
Nature and scope of the Danish exchange controls	136
Nature and scope of the Finnish exchange controls	140
Nature and scope of the Norwegian exchange controls	142
Nature and scope of the Swedish exchange controls	148
Intra-regional comparison of the process of external deregulation	151
Concluding remarks on external deregulation	154
7 Internal bond market deregulation	157
The emergence of markets	157
Tax burden in the regional perspective	166
Supervisory structures	181
Concluding remarks on internal liberalization and tax harmonization	186
8 Monetary integration	190
Danish exchange rate arrangements	192
Finnish exchange rate arrangements	193
Norwegian exchange rate arrangements	196
Swedish exchange rate arrangements	197
An intra-regional comparison	199
Behaviour of exchange rates	204
Concluding remarks on monetary integration	220

9 Political risk	225
The elements of political risk	226
Relative indebtedness as an indicator of political risk	229
The historical record of changing market rules as a source of political risk	232
Political risk and indirect segmentation – concluding remarks	236
10 Development of primary bond markets	239
Major types of bonds and issuers	239
The development of primary bond markets – a country-by-country presentation	241
Issues on international bond markets	259
An intra-regional comparison of the status of primary markets at the beginning of the 1990s	263
Concluding remarks on primary bond markets	267
11 Bond markets in a corporate perspective	271
Aspects of capital structure – the choice between equity and debt	272
The financing of new investments	284
The empirical role of bonds in non-financial companies – the liability side	290
The empirical role of bonds in non-financial companies – the asset side	298
Concluding remarks on the role of bonds and bond markets to non-financial companies	300
12 Efficiency of secondary bond markets	308
Indicators of well-functioning secondary markets	308
Indicators of static efficiency in the secondary bond markets	309
Indicators of dynamic efficiency in the secondary bond markets	320
Concluding remarks on the efficiency of the secondary markets	331
13 Historical patterns in national bond rates	335
Description of interest rate series used in the analysis	335
The development of nominal national bond rates	338
Real national bond rates	350
Concluding remarks on bond rates	355
14 Bond rate fluctuations in a global perspective	358
The degree of total integration of national bond markets	359
Gaps between nominal national and foreign bond rates	366
Covariation between national and global nominal bond rates	381
Political risk premiums in the bond rate gaps	384
Concluding remarks about bond rate gaps	387

15 National financial markets in transition: summary of a regional experience of the globalization process	394
Regional aspects of the transition phase	396
Savings patterns and the existence of political risks	397
What triggered the globalization, and when?	398
Internal deregulation and tax reforms	399
External deregulation as a gradual process	402
Deviations from the 'optimal' integration sequence	404
Globalization and structural changes to national credit markets	409
Globalization and corporate indebtedness	410
To what extent did the transition affect the bond market structure?	411
Globalization and the funding of small and medium-sized companies	414
Some lessons to be learnt from the process of transition	416
Some perceived threats	416
<i>Author index</i>	418
<i>Subject index</i>	421

Figures

1.1	The monetary policy option triangle	11
2.1	Evolving degree of liberalization of capital movements	49
3.1	Net foreign debt in the Nordic countries	66
3.2	Index for industrial investment in individual Nordic countries as compared to the OECD average	72
3.3	Nominal Nordic long-term interest rates	73
3.4	Real Nordic <i>ex post</i> bond rates	74
3.5	Rates of inflation	75
4.1	Market segmentation, availability of funds, and the marginal cost of capital	85
4.2	National gross saving and investment rates	91
4.3	Private and government gross saving ratios	96
4.4	Net household saving ratios	104
5.1	Choice of approach in analysing financial integration	115
5.2	Equilibrium relationships between changes in exchange rates, rates of inflation and interest differentials	118
7.1	Net lending by sectors in the Nordic economies	159
8.1	Interest rate differential between the ECU and the Norwegian krone, the Swedish krona and the Finnish markka, respectively	202
8.2	Exchange rate index DKK/foreign currency	205
8.3	Exchange rate index FIM/foreign currency	205
8.4	Exchange rate index NOK/foreign currency	206
8.5	Exchange rate index SEK/foreign currency	206
8.6	Real effective DKK rate and the global competitiveness of Danish goods and services	211
8.7	Real effective FIM rate and the global competitiveness of Finnish goods and services	211
8.8	Real effective NOK rate and the global competitiveness of Norwegian goods and services	212
8.9	Real effective SEK rate and the global competitiveness of Swedish goods and services	212

8.10	Relative exchange rate risk attaching to the Danish krone	216
8.11	Relative exchange rate risk attaching to the Finnish markka	216
8.12	Relative exchange rate risk attaching to the Norwegian krone	217
8.13	Relative exchange rate risk attaching to the Swedish krona	217
9.1	Nordic foreign indebtedness in relation to US foreign indebtedness	230
9.2	Nordic foreign indebtedness in relation to the weighted foreign indebtedness of major OECD countries	231
9.3	Political risk in Denmark	233
9.4	Political risk in Finland	234
9.5	Political risk in Norway	234
9.6	Political risk in Sweden	235
10.1	Major financing alternatives	240
10.2	Total circulating Danish bonds	248
10.3	Total circulating Finnish bonds	251
10.4	Total circulating Norwegian bonds	254
10.5	Total circulating Swedish bonds	259
11.1	Annual retained earnings	287
13.1	Real interest rate trend, Sweden	351
14.1	Government bond rates, Denmark as against OECD	368
14.2	Government bond rates, Denmark as against USA	369
14.3	Government bond rates, Finland as against OECD	369
14.4	Government bond rates, Finland as against USA	370
14.5	Government bond rates, Norway as against OECD	370
14.6	Government bond rates, Norway as against USA	371
14.7	Government bond rates, Sweden as against OECD	371
14.8	Government bond rates, Sweden as against USA	372
14.9	Corporate bond rates, Denmark as against OECD	374
14.10	Corporate bond rates, Denmark as against USA	374
14.11	Corporate bond rates, Finland as against OECD	375
14.12	Corporate bond rates, Finland as against USA	375
14.13	Corporate bond rates, Norway as against OECD	376
14.14	Corporate bond rates, Norway as against USA	376
14.15	Corporate bond rates, Sweden as against OECD	377
14.16	Corporate bond rates, Sweden as against USA	377
14.17	Relative variance in inflation as a measure of currency risk in the Nordic region	388

Tables

1.1	Structure of national credit markets	9
3.1	Measures of national openness	64
3.2	Total government outlays	65
3.3	GDP per capita in selected OECD countries	69
3.4	Growth of real GDP in selected OECD countries	70
3.5	Growth of gross private non-residential fixed capital formation in selected OECD countries	71
3.6	Lack of risk capital as a barrier to innovation	76
3.7	Research and development expenditures in Nordic manufacturing companies	77
4.1	Net and gross national saving ratios	93
4.2	Relation between gross national saving and gross investment ratios	94
4.3	Correlation between government and private saving	98
4.4	Nordic private saving in an international perspective	98
4.5	Net and gross private sector saving ratios	99
4.6	Demographic and social factors influencing household saving	100
4.7	Business saving	101
5.1	Outline of total financial integration under different market assumptions	120
5.2	Indicators in the empirical analysis of increasing direct financial integration	124
5.3	Elements of the interest rate gap	129
6.1	A schematic description of the general Danish external deregulation	138
6.2	Danish external deregulation of bond issues and investment	139
6.3	A schematic description of the general Finnish external deregulation	141
6.4	Finnish external deregulations of bond issues and investment	143
6.5	A schematic description of the general Norwegian external deregulation	145

6.6	Norwegian external deregulation of bond issues and investment	147
6.7	A schematic description of the general Swedish external deregulation	149
6.8	Swedish external deregulation of bond issues and investment	150
7.1	The abolition of rate and quantity regulations in the banking sector	161
7.2	Internal deregulation of the Danish bond market	163
7.3	Internal deregulation of the Finnish bond market	163
7.4	Internal deregulation of the Norwegian bond market	164
7.5	Internal deregulation of the Swedish bond market	165
7.6	Main features of capital-income taxation in the first half of the 1980s	167
7.7	Changes in personal income tax rates	178
7.8	Corporate tax allowances	179
7.9	Changes in corporate income tax rates	180
7.10	Nordic tax wedges	180
7.11	Supervisory authorities for banking, insurance and securities in major OECD countries	182
7.12	Major differences in regulatory segmentation and functional supervision	183
7.13	Nordic supervisory authorities (and dates of changes in authority)	184
8.1	Devaluations in the Nordic countries (official changes in central parities)	191
8.2	National baskets weights before pegging to the ECU	200
8.3	Central value and margin of fluctuation for the currencies of Norway, Sweden and Finland	201
8.4	Mean and standard deviation as monthly percentage change in the spot rate DKK/foreign currency	207
8.5	Mean and standard deviation as monthly percentage change in the spot rate FIM/foreign currency	208
8.6	Mean and standard deviation as monthly percentage change in the spot rate NOK/foreign currency	209
8.7	Mean and standard deviation as monthly percentage change in the spot rate SEK/foreign currency	210
8.8	Gross operating surplus in Nordic manufacturing and deviations from purchasing power parity	213
8.9	Mean and average squared deviation from purchasing power parity	214
8.10	Correlations between monthly changes in the spot price of different currencies in DKK, 1974–91	219
8.11	Correlations between monthly changes in the spot price of different currencies in DKK, July 1989 to December 1991	219

8.12	Correlations between monthly changes in the spot price of different currencies in FIM, 1974–91	220
8.13	Correlations between monthly changes in the spot price of different currencies in FIM, July 1989 to December 1991	220
8.14	Correlations between monthly changes in the spot price of different currencies in NOK, 1974–91	221
8.15	Correlations between monthly changes in the spot price of different currencies in NOK, July 1989 to December 1991	221
8.16	Correlations between monthly changes in the spot price of different currencies in SEK, 1974–91	222
8.17	Correlations between monthly changes in the spot price of different currencies in SEK, July 1989 to December 1991	222
10.1	Bond issues by Nordic borrowers	243
10.2	Relative size of outstanding stocks of Nordic bonds	244
10.3	Timetable for institutional changes relating to the Danish bond market	246
10.4	Timetable for institutional changes relating to the Finnish bond market	250
10.5	Timetable for institutional changes relating to the Norwegian bond market	253
10.6	Timetable for institutional changes relating to the Swedish bond market	257
10.7	External bond offerings from three major borrowers and Nordic borrowers	261
10.8	External bond issues by currency	262
10.9	The largest currency sectors in the global bond market	265
10.10	Composition of borrowing on the international bond market	266
11.1	Debt ratios in non-financial companies in some OECD countries	282
11.2	Debt ratios in Nordic manufacturing companies	282
11.3	Sources of funds: non-financial companies in some OECD countries	284
11.4	Nordic net manufacturing investment	286
11.5	Sources of funds: Swedish companies	286
11.6	New equity issues in Nordic manufacturing industries	288
11.7	The role of new equity issues in financing Nordic manufacturing investments	288
11.8	Sources and uses of capital in Swedish companies	289
11.9	Liabilities of Danish non-financial companies	291
11.10	Liabilities of Finnish non-financial companies	292
11.11	Liabilities of Norwegian non-financial companies	293
11.12	Liabilities of Swedish non-financial companies	294
11.13	Short-term debt in Nordic manufacturing companies	295

11.14	Long-term debt in Nordic manufacturing companies	296
11.15	Securitization in the Nordic markets: the non-financial sector perspective	297
11.16	Bond securitization in Nordic non-financial companies	299
11.17	Bonds in Nordic companies on the asset side	299
12.1	Registration and reporting requirements on the Nordic bond markets	311
12.2	J.P. Morgan Government Bond Index	313
12.3	Annual reported bond turnover	316
12.4	Annual bond turnover on the Nordic stock exchanges	317
12.5	Liquidity of national bond markets	318
12.6	Benchmark dates for innovations in the global market	326
12.7	Dates of introduction of different bonds and bond-based derivatives on the Nordic exchanges	328
12.8	The size of Nordic lags in adopting major international bond innovations	329
12.9	The lag in the dissemination of innovations to the Nordic national bond markets	330
12.10	Measures of adaptability and dynamic efficiency on the Nordic bond markets	331
13.1	Mean and standard deviation in national Nordic nominal interest rates	339
13.2	Covariation between Danish interest rate movements	341
13.3	Covariation between Finnish interest rate movements	342
13.4	Covariation between Norwegian interest rate movements	343
13.5	Covariation between Swedish interest rate movements	344
13.6	Correlation between nominal interest rate and 'expected' inflation in Denmark	346
13.7	Correlation between nominal interest rate and 'expected' inflation in Finland	347
13.8	Correlation between nominal interest rate and 'expected' inflation in Norway	348
13.9	Correlation between nominal interest rate and 'expected' inflation in Sweden	349
13.10	Mean and standard deviation in Danish real bond rates	352
13.11	Mean and standard deviation in Finnish real bond rates	352
13.12	Mean and standard deviation in Norwegian real bond rates	353
13.13	Mean and standard deviation in Swedish real bond rates	353
13.14	Correlation between real bond rates and inflation in the Nordic countries	354
14.1	Correlation between Danish real bond rate movements and corresponding movements in the OECD and US bond rates	362

14.2	Correlation between Finnish real bond rate movements and corresponding movements in the OECD and US bond rates	363
14.3	Correlation between Norwegian real bond rate movements and corresponding movements in the OECD and US bond rates	364
14.4	Correlation between Swedish real bond rate movements and corresponding movements in the OECD and US bond rates	365
14.5	Covariation between movements in Nordic national bond rates, 1974 to June 1991	379
14.6	Covariation between movements in Nordic national bond rates, 1987 to June 1991	380
14.7	Maximal correlation between lagged bond rate movements, Nordic rates as compared to global rates	382
14.8	Average gaps in periods of high political risk	386
15.1	The sequence of events in the deregulation process	404
15.2	Average gaps between the national and the global bond rates in different institutional periods	406
