Chapter 1 The Global Interdependence of National Financial Markets	1
1.1 Many signs of increasing market integration	1
1.2 Previous integration studies demonstrate difficulties in measurement and interpretation	2
1.3 The aim is to measure the level of financial integration	4
1.4 Different forms of financial integration	4
1.5 Interest rate differential or capital flow as dependent variable?	6
1.6 What types of interest rate are relevant to an analysis of financial integration?	7
1.7 What interest rates are the "leaders", as the influence of the US rate declines?	8
1.8 Why is the level of financial integration interesting in a macro-perspective?	10
1.9 What is the significance of the level of financial integration in a micro or corporate perspective?	12
1.10 Is the interest rate in a small open economy determined on foreign markets?	13
1.11 Growing uncertainty raises demands for higher risk premiums	14
1.12 The internationalization of trade	14
1.13 The internationalization of financing	15
1.14 The internationalization of production	16
1.15 Design of the analysis	16
1.16 Plan of the book	17
Chapter 2 What Is Financial Integration, and Can It Be Measured?	19
2.1 Introduction	19
2.2 Are interest rates determined at home or abroad?	20
2.3 Capital flows and the links between markets	34

2.4	Exchange rate determinants and market expectations	42
2.5	Transaction costs and different types of risk premium	50
2.6	The link between risk and return	59
2.7	Financial integration and monetary autonomy – some measures and analytical approaches	62
2.8	Applied definition and the choice of model	69
2.9	Disintegration and monetary autonomy by way of controls	72
2.10	Problems of measurement and standardization	74
2.11	Collecting primary data	78
2.12	Concluding comment on the methodological problems	80
	Appendix	
2.1	Fisher (Domestic) Effect	81
2.2	Variability in interest rates after tax	81
2.3	The International Fisher Effect	83
2.4	Model for determining the exchange rate	86
2.5	Example of a portfolio approach	87
2.6	The interest rate parity theory	91
2.7	Swedish industrial groups with a turnover exceeding SEK 1 billion in 1981	94
Chapter 3	Results and Findings from Earlier Studies of Financial Integration	105
3.1	Introduction	105
3.2	Studies of the interest-sensitivity of capital flows	105
3.3	Equal expected returns as an indicator of direct financial integration	111
3.4	Observations from the literature – a summary	134
	Appendix	
3.1	Adjusting portfolios in an open economy	136
Chapter 4	Characteristic Features of the Financial Market in a Small Open Economy – the Case of Sweden	141
4.1	Introduction	141

4.2	Actors on the Swedish financial market	142
4.3	Rates of interest and administrative control mechanisms	148
4.4	Swedish exchange controls and their effect on segmentation	156
4.5	The Swedish krona – historical exchange rate patterns and the formation of expectations on the market	170
4.6	Specific measurement problems	188
	Appendix	
4.1	Date of abolition of monetary policy regulations, 1978–85	193
4.2	Exchange rate index	194
4.3	Standard deviations in the forward and spot rates	195
4.4	Foreign exchange flows 1974–84	195
4.5	Current account reporting according to SCB	201
Chapter 5	Fluctuations in Swedish Interest Rates – Historical Patterns	205
5.1	Introduction	205
5.2	Nominal and real Swedish interest rates 1974–84	205
5.3	Correlation between successive quotations of Swedish interest rates	215
5.4	The interest rate pattern and direct financial integration	217
Chapter 6	Swedish Interest Rate Fluctuations in an International Perspective	223
6.1	Introduction	223
6.2	How Swedish nominal interest rates deviate from foreign interest rates	223
6.3	Deviations of Swedish real interest rates from foreign real interest rates	243
6.4	What does this initial comparison suggest about financial integration?	245
Chapter 7	Swedish Interest Rate Dependence: A Correlation Analysis	247
7.1	Introduction	247

7.2	Covariation between Swedish and foreign real interest rates	248
7.3	Covariation between the Swedish nominal interest rate and the foreign rate	251
7.4	Covariation between the Swedish interest rate and the forward–covered foreign interest rate	257
7.5	The correlation analysis and direct financial integration	263
Chapter 8	A Model–Based Analysis of Direct Financial Integration	267
8.1	Introduction	267
8.2	Analysis of deviations from the International Fisher Effect	268
8.3	Analysis of deviations from interest rate parity	275
8.4	The forward rate as an unbiased estimate of the future exchange rate	279
8.5	Presentation of the model	281
8.6	Analysis of the gap between Swedish and foreign discount rates	294
8.7	Analysis of the gap between Swedish and foreign interest rates on treasury discount notes	304
8.8	Analysis of the gap between Swedish and foreign prime rates	314
8.9	Analysis of the gap between the Swedish interest rate on government bonds/government notes and the corresponding foreign rate	321
8.10	Analysis of the gap between Swedish and foreign interest rates on industrial bonds	329
Chapter 9	Interest Rate Autonomy and the Foreign Dependence of the Swedish Financial Market – A Summary	341
Supplement 1	Mean and standard deviation in the international interest rates 1974–84	355
Supplement 2	List of variables and abbreviations	360
Index		364
Bibliography		371

List of Figures

1.1	Equilibrium relationships between changes in exchange rates, rates of inflation and interest differentials	9
1.2	The monetary policy triangle	10
2.1	Supply and demand for capital – the real equilibrium interest rate	24
2.2	National and international financial markets	30
2.3	Euromarket versus national market	31
2.4	Information flows and financial links	35
2.5	Outline of total financial integration under different market assumptions	37
2.6	Factors affecting the Swedish money supply in the budget year 1983/84	38
2.7	Corporate risks	54
2.8	Choice of approach in analysing financial integration	67
A2.1	Expected return and standard deviation on portfolios based on two assets	90
A2.2	Efficient portfolios	91
A2.3	Arbitrage argument – deviations from interest rate parity	93
3.1	Nominal financial balances in relation to trade flows, 1963–84	107
4.1	Outstanding sums for different instruments on the Swedish money market 1980–85	150
4.2	Money market interest rates in Sweden and the central bank's discount rate 1978–85	154
4.3	Interest rate scale for banks' borrowing from the central bank	155
4.4	Exchange rate index SEK/foreign currencies 1970–84	175
4.5	Weekly changes in the (spot) price in Swedish kronor of the most important currencies in the Swedish currency basket 1974–84	177
4.6	Real effective exchange rates – major OECD countries 1976–86	179
4.7	Real effective exchange rates – small and relatively open economies 1976–86	180
4.8	Non-government capital flows according to SCB's and the central bank's estimates 1974–84	192
5.1	Nominal interest rates 1900–1985	206
5.2	Penalty rate and interest rate on three-months treasury discount notes 1982–85	209
5.3	Real interest rate trend 1900–1985	212

5.4	Real rate of return and real market interest rate 1951–85	214
6.1	Official discount rate 1970–84	224
6.2	Sweden's official discount rate vis-à-vis the weighted average of the OECD countries' discount rates 1974–84	228
6.3	Sweden's official discount rate vis-à-vis the US discount rate 1974–84	229
6.4	Interest rate on Swedish three-month treasury bills/treasury discount notes vis-à-vis the weighted average for corresponding interest rates in some of the larger OECD countries 1974–84	230
6.5	Interest rate on Swedish three-month treasury bills/treasury discount notes vis-à-vis corresponding rate in the USA 1974–84	231
6.6	Lending rate to first-class borrowers (prime rate) in Sweden vis-à-vis the weighted trend of the corresponding rates in the 11 largest OECD countries 1974–84	234
6.7	Lending rate to first-class borrowers (prime rate) in Sweden vis-à-vis the corresponding rates in the USA 1974–84	235
6.8	Interest rate on Swedish government bonds/government notes vis-à-vis the weighted rate for government bonds in the 11 largest OECD countries 1974–84	236
6.9	Interest rate on Swedish government bonds/government notes vis-à-vis the corresponding rate for the US government bonds 1974–84	237
6.10	Interest rate on Swedish industrial bonds vis-à-vis the weighted average of the corresponding interest rate in the six largest OECD countries 1974–84	240
6.11	Interest rate on Swedish industrial bonds vis-à-vis a corresponding rate for industrial bonds in the USA 1974–84	241
6.12	Real yield on industrial bonds 1960–84	245
7.1	Empirical pattern of correlation	253
8.1	Deviations from the International Fisher Effect in an analysis of ex post data SEK/USD, 1974–84	270
8.2	Deviations from the International Fisher Effect in an analysis of ex post data SEK/GBP, 1974–84	270
8.3	Index of additional cost to a Swedish borrower of borrowing in USD or CHF as compared to SEK, 1974–84	273
8.4	Deviations from interest rate parity, SEK/USD, 1974–84	276
8.5	Deviations from interest rate parity, SEK/GBP, 1974–84	276

List of Tables

2.1	Indications of interest rate policy autonomy	63
2.2	Indications of increasing direct financial integration	72
A3.1	Differences between the stock and flow versions as regards the short-run response to disturbances	136
4.1	Financing the government borrowing requirement	144
4.2	Non-government capital transactions	147
4.3	Discount rate and penalty interest rate changes 1980–84	153
4.4	Multinationals' view of exchange controls	165
4.5	Additional cost to the company due to the requirements of the exchange controls	167
4.6	Corporate investment behaviour and the cost calculus for the exchange controls	168
4.7	Mean and standard deviation in weekly percentage change in the spot rate	176
4.8	Explanatory variables or indicators in generating exchange rate forecasts in Swedish multinational groups	182
4.9	Identification and ranking in US multinational groups of the most useful indicators of future exchange rate movements	183
4.10	Correlation between the weekly percentage change, compared with the currency basket, in the spot price of different currencies expressed in SEK, 1974–76	186
4.11	Correlation between the weekly percentage change, compared with the currency basket, in the spot price of different currencies expressed in SEK, 1978–84	186
A4.1	Standard deviation in three-month relative changes in spot rate and forward rate, 1974–84	196
A4.2	Current account and foreign exchange flows 1974–84 according to SCB's and the Swedish central bank's reports	197
A4.3	Specification of current account outcomes according to SCB 1978–84	201
5.1	Mean and standard deviation in Swedish nominal interest rates 1974–84	208
5.2	Covariation between Swedish interest rate movements 1974–84	210
5.3	Mean and standard deviation in the Swedish real interest rates 1974–84	213

5.4	The "best" ARIMA model for movements in Swedish interest rates (First differential)	218
5.5	Correlation between nominal interest rate and "expected" and actual inflation in Sweden 1974–84	220
5.6	Correlation between actual real interest rate and actual inflation in Sweden 1974–84	220
6.1	Major shifts in the discount rate development 1966–84	226
6.2	Major shifts in the interest rate development for treasury bills/treasury discount notes 1974–84	232
6.3	Major shifts in prime interest rate development 1974–84	233
6.4	Major shifts in the interest rate development for government bonds 1961–84	238
6.5	Major shifts in the interest rate development for industrial bonds 1974–84	239
6.6	Standard deviations in interest rates on government bonds 1968–85	243
6.7	Real yield on industrial bonds 1965–84	244
7.1	Correlation between Swedish real interest level and corresponding real level for the global interest rate and the US interest rate, 1974–84	249
7.2	Correlation between Swedish real interest movements and corresponding movements in the global interest rate and the US interest rate, 1974–84	250
7.3	Cross-correlation pattern for Swedish interest rate/foreign rate with significant lag in number of months (level), 1974–84	252
7.4	Cross-correlation pattern for Swedish interest movement/foreign interest movement with significant lag in number of months (first differential), 1974–84	255
7.5	Maximal correlation between lagged interest movements, 1974–84	256
7.6	Cross-correlation pattern for Swedish interest rate/covered foreign rate with significant lag in number of months (levels), 1974–84	259
7.7	Cross-correlation pattern for Swedish interest movements/covered foreign interest movements with significant lag in number of months (first differential), 1974–84	260
7.8	Maximal correlation between lagged changes in Swedish interest rate and in covered foreign rate, 1974–84	262

8.1	Mean and standard deviation in the deviation from the International Fisher Effect based on three-month treasury bill rates	271
8.2	Mean and standard deviation in the deviation from the International Fisher Effect based on three-month commercial bank prime lending rates	272
8.3	Additional cost of foreign loans for a Swedish borrower divided between an interest-rate component and a foreign exchange rate component	274
8.4	Mean and standard deviation in the deviation from interest rate parity based on three-month treasury bill rates	278
8.5	Mean and standard deviation in the deviation from interest rate parity based on three-month commercial bank prime lending rates	279
8.6	Relative three-month forward premium/discount as a forecast of relative changes in exchange rate, 1974–84	281
8.7	Excerpt for presentation of analysis results	284
8.8	Difference between the Swedish discount rate and the global discount rate, 1974–84	295
8.9	Difference between the Swedish discount rate and the global discount rate, 1979–84	297
8.10	Difference between the Swedish discount rate and the US discount rate, 1974–84	298
8.11	Difference between the Swedish discount rate and the US discount rate, 1979–84	299
8.12	Mean and standard deviation in the deviation from purchasing power parity for the Swedish krona	301
8.13	Difference between the Swedish interest rate on treasury bills/treasury discount notes and the corresponding global interest rate, 1974–84	306
8.14	Difference between the Swedish interest rate on treasury bills/treasury discount notes and the corresponding global interest rate, 1979–84	307
8.15	Difference between the Swedish interest rate on treasury bills/treasury discount notes and the corresponding US interest rate, 1974–84	308
8.16	Difference between the Swedish interest rate on treasury bills/treasury discount notes and the corresponding US interest rate, 1979–84	309
8.17	Difference between the Swedish interest rate on treasury bills/treasury discount notes and the corresponding covered global rate, 1974–84	312
8.18	Difference between the Swedish interest rate on treasury bills/treasury discount notes and the corresponding covered global rate, 1979–84	312
8.19	Difference between the Swedish interest rate on treasury bills/treasury discount notes and the corresponding covered US rate, 1974–84	313

8.20	Difference between the Swedish interest rate on treasury bills/treasury discount notes and the corresponding covered US rate, 1979–84	313
8.21	Difference between the Swedish prime rate and the corresponding global interest rate, 1974–84	315
8.22	Difference between the Swedish prime rate and the corresponding global interest rate, 1979–84	317
8.23	Difference between the Swedish prime rate and the corresponding US rate, 1974–84	318
8.24	Difference between the Swedish prime rate and the corresponding US rate, 1979–84	319
8.25	Difference between the Swedish prime rate and the corresponding covered global rate, 1974–84	322
8.26	Difference between the Swedish prime rate and the corresponding covered global rate, 1979–84	322
8.27	Difference between the Swedish prime rate and the corresponding covered US rate, 1974–84	323
8.28	Difference between the Swedish prime rate and the corresponding covered US rate, 1979–84	323
8.29	Difference between the Swedish interest rate on government bonds and the corresponding global rate, 1974–84	325
8.30	Difference between the Swedish interest rate on government bonds and the corresponding global rate, 1979–84	326
8.31	Difference between the Swedish interest rate on government bonds and the corresponding US rate, 1974–84	327
8.32	Difference between the Swedish interest rate on government bonds and the corresponding US rate, 1979–84	328
8.33	Difference between the Swedish interest rate on industrial bonds and the corresponding global rate, 1974–84	331
8.34	Difference between the Swedish interest rate on industrial bonds and the corresponding global rate, 1979–84	333
8.35	Difference between the interest rate on Swedish industrial bonds and the corresponding US rate, 1974–84	334
8.36	Difference between the interest rate on Swedish industrial bonds and the corresponding US rate, 1979–84	335
9.1	Measure of direct financial integration based on models for the periods 1974–84 and 1979–84	347

9.2	Degree of direct financial integration during the whole of the studied period 1974–84 and changes in relation to the period 1979–84	348
9.3	Deviations from covered interest rate parity as an estimate of the arbitrage cost	349
9.4	Indications of Swedish interest policy autonomy for the whole studied period 1974–84 and changes in this compared with the subperiod 1979–84	351
